

Sarah's Signature Ceremonies

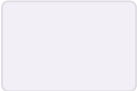

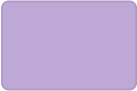

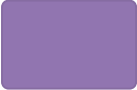

BRAND COLOUR REFERENCE

For: Print & signage suppliers, designers, embroiderers.

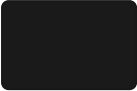

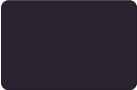

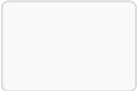

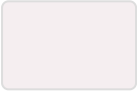

Profile: CMYK values are derived using the macOS Generic CMYK ICC profile (close to *FOGRA39 / ISO Coated v2*, the UK/EU print standard). Any printer using FOGRA39, GRACoL or SWOP can re-derive exact values from the supplied vector files; treat these as targets, not gospel.

Hero colour: Lilac 700 — use this whenever a single brand colour is needed.

Lilac scale

SWATCH	NAME	HEX	RGB	CMYK	PANTONE (NEAR)
	Lilac 50 Background tint, page wash	#F3EFF6	243 / 239 / 246	4 / 6 / 1 / 0	2706 C

	Gold (accent) Foiling, fine details only	#B89A6A	184 / 154 / 106	25 / 35 / 60 / 10	872 C / 4515 C

For your printer: Open the supplied sarah-henry-logo-colour-CMYK.pdf or sarah-henry-logo-colour-CMYK-white-bg.eps in Adobe Acrobat Pro / InDesign / Illustrator with their target colour profile (e.g. FOGRA39 for UK, GRACoL for US) and read swatch values directly from the document. The values above are reference targets so you can match on Pantone-aware presses, embroidery thread, vinyl signage and digital print.
